

Response to Editor's request

# MR-2021-55

*However, I believe some minor changes are still missing in the caption of figure 3 (values of delta1, delta2, delta3 and Delta), which should be fixed before publication.*

Response:

The Figure caption has been updated.

In addition, we have added two references which were accidentally omitted in the previous version. (see pp. 7, 11, 12)
