

Compared to the accepted version of the manuscript, the version uploaded today contains some very minor corrections:

- Added a second doi for NMR data uploaded to Zenodo (namely for spectra added in the revised version) – line 453,
- Corrected instances of SARS-2 to SARS-CoV-2 (which is the correct name and used also in the titles of the references cited, as pointed out by one of the co-authors),
- Fixed a typo by putting brackets around the first occurrence of PpiB – line 75,
- Removed blank spaces and hyphens in compound names – line 22 and 57.
