# Editor comments/review (Stefan Stoll):

There appear to be some residual notational issues.

- Table 1 lists V and V' as density matrices, but the main text appears to use different symbols.

- Eq.11 says \sigma'_V, but the line prior it's called V'.

I suggest to check the manuscript carefully for such issues.

*Thank you, Stefan, for the careful reading and spotting this issue/typo.*

*As you suggested, we took the opportunity for another careful round of corrections and found a few typos or grammar errors, however, we found all other equations to be correct. The changes we made can the seen highlighted in red in the tracked changes document.*
