

The reviewer recommends the following revisions:

In the line 20, it is possible to avoid repetition of word 'extension' by changing the second one e.g. to 'application'.

In the line 32, the NORD abbreviation is used, while the explanation of the abbreviation can be found only in the line 58. Please explain the abbreviation already in the line 32.

In the line 72, the full-stop mark and letter C in "(Fig 1 C) ." are applied after a space, where there should be no space in-between (e.g. "(Fig 1C)"). Please correct it.

In the line 99, the abbreviation APT is not explained. Please correct it.

In the line 112, the sentence starting with "The Dual-TANGO..." lacks a predicate, e.g: "... excitation is followed by ..." instead of "... excitation followed by ..."

Therefore, I propose to accept the article for publication after correcting those minor points.

As the recommendations essentially refer to typos and single word formulations, we applied all of them in the manuscript, which certainly improved the readability.
