

Dear Thomas,

Thank you for your swift handling of our manuscript and the positive decision.

- We have put the spectrum from Figure S9 back into the main text (as Figure 4), as requested by the reviewer.
- Thank you for catching this format issue. The space between the numbers and units is a bit short, but we have followed the guidelines for the LaTeX template. (“Please use `\unit{}` and apply the exponential notation (e.g. `20\unit{W\,m^{-2}}`).”) We agree that the space appears a bit short, but we assume that in the typesetting process this will turn out well.
- We have corrected the font to italic in all instances of “*L*-phenylalanine”, “*L*-tryptophan” and similar.

We have already numbered the figure files according to the guidelines (f01, f02,...) and also aligned with the other format issues.

We have also included a “key figure” in the directory of the figures.

Perhaps with this we have then already now all the production files in place.

Thanks for handling this manuscript, and all the best,

A handwritten signature in blue ink, appearing to read 'Paul', is positioned above the name 'Paul'.

Paul
